Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a fertilizer, classified in class 71, subclass 21.
- II. Claims 10-17, drawn to a "system", classified in class 422, subclass 291.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by using odor control agents instead of scrubbing, and heat sterilization by convection drying instead of pasteurization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1761

A telephone call was made to Mr Van Buren on 9/8/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Note that because claims 10-11 recite "a system" which is not a statutory class, and claims 12-17 that depend from them recite " a process", claims 10-17 have been interpreted as being drawn to a process, for purposes of this restriction requirement.
